

Lucas Alberto Eichhorn

I am an Argentinian Data Engineer based in Amsterdam with 5+ years of experience in Data Engineering and 6+ years in the software industry previously. My background as a Full Stack Developer has provided me with a strong software engineering foundation, enabling me to build reliable, scalable, and production-ready data solutions.

In 2021, I moved to Madrid to pursue a Master's degree in Big Data Science, transitioning my career towards Big Data and AI technologies. More recently, I relocated to Amsterdam to pursue new professional opportunities and continue growing in an international technology environment.

I combine software engineering best practices with modern data technologies to design scalable data platforms, build robust pipelines, and deliver data-driven solutions that create business value.

CERTIFICATIONS

- Fabric Data Engineer Associate
Azure – 06/2026
- Professional Cloud Architect
Google Cloud – 04/2026
- Professional Data engineer
Google Cloud – 11/2025
- Professional Cloud Security Engineer
Google Cloud – 04/2025
- Professional Cloud DevOps Engineer
Google Cloud – 10/2024
- Professional ML Engineer
Google Cloud – 09/2024
- DP-900 Azure Data fundamentals
Microsoft Azure – 09/2022
- AI-900 Azure AI fundamentals
Microsoft Azure – 06/2022
- AZ-900 Azure fundamentals
Microsoft Azure – 05/2022
- AWS Cloud Practitioner Essentials
AWS – 05/2021
- GitLab Certified Associate
Gitlab – 05/2021
- Scrum Grand Master
National Technological Uni.(Arg) – 09/2019

JOBS EXPERIENCE

Big Data Engineer / Architect on GCP 04/2026 – running
Stage Entertainment Operations B.v. – Amsterdam, NL

- Transitioned to an international data architecture role, supporting countries.
- Define and govern global data architecture standards
- Providing data engineering and architectural support to local teams

Big Data Engineer on GCP 11/2024 – 03/2026
Stage Entertainment España – Madrid, ES

- Integrated multiple data sources into a centralized Data Warehouse.
- Designed and migrated CRM pipelines to HubSpot.
- Standardized and optimized ETL processes for efficiency and scalability.
- Implemented security and compliance best practices

Big Data Engineer on GCP @ Havas Media 06/2023 – 11/2024
Hiberus – Madrid, ES

- Design and development of data Infrastructures and modeling
- Database migration and optimization for Big Data projects
- Collaboration with Data Scientists teams
- Data integration from many sources (databases, APIs and file systems)
- Processes automation and optimization

Big Data Engineer on AWS/Azure @ MITMA 10/2021 – 06/2023
Hiberus – Madrid, ES

- Databases analysis, design and migration, guaranteeing the integrity and security of the information.
- APIs and web services integration
- Maintenance and updating existing systems, optimizing performance and functionality with IaC
- Data modeling and dashboards development with PBI

Web Full Stack developer & Tech Lead 06/2020 – 10/2021
Doctorplus SAS – France, Remote

- Tech Lead and Team management
- Maintaining and updating websites, adding new features.
- Research and implementation of WebRTC and real time technologies to improve work efficiency and quality.

TECH STACK

- Clouds: Google Cloud, AWS, Azure
- BD: BigQuery, Redshift, SQL Server, Postgres, MariaDB/MySQL, Oracle
- NoSql: MongoDB, DynamoDB
- Cloud Functions, Lambdas, Azure Functions
- Data Factory, Airflow, Streamsets, DataFusion, Dataprep, Dataform, DBT
- Programming: Python, PHP, JavaScript, .Net / C#, Java
- Frameworks: Flask, Laravel, NextJS, .Net Framework
- Docker, Kubernetes
- Terraform, GitHub Actions
- Databricks, Apache Spark
- Snowflake
- Microsoft Power BI
- QA: Selenium, Cucumber, WebDriverIO, JEST / Enzyme
- React, Angular
- HTML, CSS, jQuery
- Scrum / Trello / Jira

LANGUAGES

- **Spanish:** Native Speaker
- **English:** Professional working proficiency

Web Full Stack developer

01/2020 - 06/2020

MercadoLibre - Santa Fe, ARG

- Leading e-commerce platform in Latin America
- APIs and databases integration in back-end.
- Building efficient frontends with React for a 25M monthly visits site.

Web Full Stack developer @ Santander

07/2019 - 01/2020

Neoris - Santa Fe, ARG

- APIs and web services integration to improve functionality and UX in online banking process.
- Programming, maintaining and deploying apps with different tools and languages.

Web Full Stack developer & Tech Lead

11/2015 - 07/2019

Xinergia - Santa Fe, ARG

- Tech Lead and Team management
- Implementation and maintenance of efficient and scalable databases.
- Implementation of software solutions based on customer needs.
- Training and mentoring new members on the company.
- Project management using agile methodologies.

EDUCATION

Master's degree in Big data Science

10/2021 - 07/2022

University of Navarra - Madrid, ES

Statistics, Data analysis, Data science, Machine Learning

Informatic Systems engineering degree

01/2012 - 08/2019

National Technological University - Santa Fe, ARG

Software engineering and design, DB administration and networking

COURSES

Data engineering

09/2021

Datademia | Online - 60hs

Python for data analysis

11/2021

Datacamp | Online - 30hs

Machine Learning & Data Science on Python

04/2021

Udemy | Online - 30hs

React & Redux Development

09/2019

Udemy | Online - 60hs
