

Lucas Eichhorn

Senior Data Engineer | Python · SQL · Cloud Data Platforms | GCP · AWS · Azure
Amsterdam, Netherlands · [linkedin.com/in/lucas-eichhorn](https://www.linkedin.com/in/lucas-eichhorn) · lucaseichhorn.com.ar

SUMMARY

Senior Data Engineer with 11 years of technology experience, including 5+ years in data engineering and 6+ years in software engineering. Hands-on experience across GCP, AWS and Azure, delivering data platforms for entertainment, advertising, and public transport. Based in Amsterdam following an internal relocation to the Netherlands, defining global data architecture standards and building scalable GCP data infrastructure at Stage Entertainment. Strong software engineering foundation with multiple programming languages, SQL and cloud-native development, combined with practical experience in data modelling, ETL/ELT, distributed processing and ML workflows. I enjoy owning technical solutions end-to-end and collaborating with international teams, sharing knowledge and finding practical, effective solutions.

CORE TECHNICAL SKILLS

Cloud Platforms: Google Cloud Platform (BigQuery, Dataform, Cloud Run Functions, Cloud Storage, Dataflow, Vertex AI) · Microsoft Azure (Azure SQL, Azure Functions, Azure Data Factory, Microsoft Fabric) · AWS (Redshift, DynamoDB, Lambda)

Data Engineering: dbt, Dataform, Airflow, PySpark, Databricks, DataProc, ETL/ELT, Data Modelling, Data Warehousing, APIs

Programming: Python, SQL, Java, JavaScript, PHP, C#/.NET, Pandas

DevOps & Infrastructure: Terraform, Docker, Kubernetes, GitHub Actions, Azure DevOps, CI/CD, Infrastructure as Code

Databases & BI: BigQuery, PostgreSQL, SQL Server, Oracle, MySQL, MongoDB, DynamoDB, Snowflake, Redshift, Power BI

PROFESSIONAL EXPERIENCE

Data Engineer / Data Architect — GCP Apr 2026 – Present

Stage Entertainment — Amsterdam, Netherlands

- Define and govern global data architecture standards across countries, improving consistency, scalability and security of data platforms.
- Advise local teams on data warehousing, pipeline optimisation, data modelling, integration and cloud architecture.
- Design scalable, secure and standardised GCP-based data solutions with international stakeholders.
- Developed AI-powered BigQuery data agents that enable business users to query data in natural language without SQL knowledge.

Data Engineer — GCP Nov 2024 – Mar 2026

Stage Entertainment — Madrid, Spain

- Designed and implemented data pipelines integrating multiple sources into a centralised BigQuery data warehouse for standardised analytics and reporting.
- Led the migration of CRM operations to HubSpot while maintaining business continuity through parallel campaign execution.
- Migrated ETL workloads from SQL Server to BigQuery/GCP, reducing processing times from hours to minutes.
- Built a production-grade CLTV classification model on Vertex AI to improve marketing audience targeting.
- Implemented security best practices and access controls to support country-level data isolation and compliance.

Data Engineer — GCP | Havas Media Jun 2023 – Nov 2024

Hiberus — Madrid, Spain

- Designed and built GCP data infrastructure and data models for large-scale social media campaigns across major brands.
- Performed database migration and optimisation for data-intensive workloads.
- Integrated data from databases, APIs and file systems into centralised data platforms.
- Productionised machine learning models on Vertex AI and Databricks, enabling automated training and inference workflows.
- Redesigned data pipelines from DataProc/Spark to Dataform and GCS, reducing processing times from hours to minutes.

Data Engineer — AWS & Azure | MITMA (Spanish Ministry of Transport) Oct 2021 – Jun 2023

Hiberus — Madrid, Spain

- Database design and migration between on-premises and AWS/Azure environments, maintaining data integrity, security and performance.
- Integrated APIs and web services to process near-real-time IoT mobility data in cloud-based solutions.
- Maintained and optimised multi-cloud systems through infrastructure-as-code practices, ensuring security and GDPR compliance.
- Developed data models and Power BI dashboards to support business reporting and analytics.

SOFTWARE ENGINEERING EXPERIENCE

Software Engineer / Tech Lead <i>Doctorplus SAS — France, Remote</i> Led technical development and team activities, maintaining and extending web applications and implementing WebRTC and real-time technology.	Jun 2020 – Oct 2021
Software Engineer <i>MercadoLibre — Santa Fe, Argentina</i> Integrated APIs and databases in backend services and built frontend features with React for LATAM’s leading e-commerce platform.	Jan 2020 – Jun 2020
Software Engineer <i>Santander Bank — Santa Fe, Argentina</i> Integrated APIs and web services for online banking processes; developed, maintained and deployed applications.	Jul 2019 – Jan 2020
Junior Software Engineer → Tech Lead <i>Xinerjia — Santa Fe, Argentina</i> Progressed from Junior Software Engineer to Tech Lead while completing university studies, taking on increasing responsibility for software development, scalable database solutions, team mentoring and Agile delivery.	Nov 2015 – Jul 2019

EDUCATION

MSc in Big Data Science <i>University of Navarra, Madrid, Spain</i> Statistics, Data Analysis, Data Science, Machine Learning	2021 – 2022
BSc in Information Systems Engineering <i>National Technological University, Santa Fe, Argentina</i> Software Engineering, Database Administration, Networking	2012 – 2019

CERTIFICATIONS

- Microsoft Fabric Data Engineer Associate — 2026
- Google Cloud Professional Cloud Architect — 2026
- Google Cloud Professional Data Engineer — 2025
- Google Cloud Professional Cloud Security Engineer — 2025
- Google Cloud Professional Cloud DevOps Engineer — 2024
- Google Cloud Professional Machine Learning Engineer — 2024
